DETAILED ACTION

International Search Report

The examiner has reviewed the International Search Report for PCT/IB
03/03414.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest an obvious combination which results in a radiation detector comprising a plurality of detector units, separated in a lateral direction by an x-ray absorption member wherein the absorption member has a wide portion and a narrow portion, and read-out circuitry is accommodated into the narrower portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,864,484 B1 discloses a detector unit with an appropriately shaped base member that does not absorb x-rays and US 7,112,799 B2 discloses a detector unit with differently shaped absorption member.
